AGRICULTURAL PRODUCTS CATALOG

About

ALLIANCE RUBBER CO.

Alliance offers a large array of products designed for produce and floral bundling.

As the original pioneer of rubber bands for produce and floral applications, we have been providing products for the industry since 1923.

Prior to Alliance, only string and twine were being used by growers. Bundling is our business, and our products are specialized to hold your produce and power your brand.

Additionally, as an American-made manufacturer, Alliance provides fresher stock, faster turnarounds, and consistent top quality. This allows growers and packers to get their produce to market as quickly as possible and looking its best. Whether you need standard rubber bands, PLU imprinted or custom imprinted rubber bands, clear floral bands, waterproof ProTape®, Brand-It™ custom hang tags, or pallet bands, we want to be your “go-to” source.

If you don't see what you're looking for in our catalog, please give us a call. Even though we may be the world's largest manufacturer of rubber bands, we still want your help to keep a sharp focus on what we can do to better meet your needs.

When you need a product that can withstand the cold, survive the heat, hold items gently, bundle items tightly, or anything in between, we have the solution.

PRODUCE AND FLORAL BANDS

Alliance makes a large range of rubber band sizes and colors that keep their hold on products even as produce items lose moisture. This maintains a fresh appearance and requires less maintenance at the store level.

ProTape® Artwork Specifications

Custom ProTape® orders require very specific artwork information to ensure the best quality in printing and reproduction:

- 3mm top and bottom margins
- Top and bottom must be the same color
- Minimum barcode size: 85% of original size
- Minimum line thickness: 0.2mm
- Maximum number of colors: 5
- Minimum font size 8 pt.

LEAD TIMES

and Variances:

Normal lead time for Custom ProTape® is 10 - 12 weeks after the final approval of artwork. All orders are subject to +/- 15% in quantity to allow for manufacturing variances. FOB: Salinas, CA.

Custom ProTape® pricing is based on up to 5 colors. The base or background tape color counts as one of the colors. The easiest and quickest way to send artwork to Alliance is by using email: agsales@alliance-rubber.com. File types that are accepted are Illustrator .eps files. The art must be in vector format. After the graphics department has completed the design, a proof will be sent to the customer for final approval.

PROTAPE[®] DISPENSERS

Alliance offers a variety of ProTape[®] dispensers to meet your needs. These dispensers make applying ProTape[®] even easier and faster.

300V

B-16

BASIC DISPENSERS

These basic dispensers allow easy handling and cutting of ProTape[®] for manual application. Both have a lightweight and durable construction making them ideal for flexible low-volume applications. The B-16 can accommodate 3" - 3.5" cores.

300V-II LARGE BUNDLE DISPENSER

This economical dispenser features an application plate to measure, cut and apply ProTape[®] to asparagus, spinach, leafy lettuces, green onions and other fresh vegetables. The 300V-II is lightweight, durable and versatile.

3000V SEMI-AUTOMATIC DISPENSER

With the push of a hand this semi-automatic dispenser measures, wraps and seals to make a secure and attractive bundle. The 3000V is three times faster than the pull and cut dispensers and built to give hassle-free service.

5000V ELECTRIC DISPENSER

When two hands are required to handle your produce, this electric ProTape[®] Dispenser can be activated by the foot pedal feature. The 5000V is built for speed and ease of application.

Eliminate

SHRINKAGE AT CHECKOUT

Reduce issues at checkout to reduce shrinkage. It's very easy to confuse organic produce with non-organic produce. In fact, for grocers, \$18.1 billion in losses can be directly traced to errors that occur when produce items are handled at POS.

The two look almost identical, but there is a considerable difference in price and quality.

FOR GROCERS

All too often, PLU items are not calculated accurately into the customer's order, resulting in substantial shrink. ProTape® gives you the added benefit of bar coding - eliminating confusion at checkout.

FOR ORGANIC GROWERS

When you use ProTape® to label your organic produce at harvest you know that the label will remain with your product until it reaches the consumer.

BRAND-IT™ CUSTOM HANG TAGS

Brand-It™ tags are a great way to promote your brand's unique selling points and limited-time offers. With eye-catching graphics and a specially-designed silicone anchor band your product will be front and center for all to see. Unlike string labels, these tags remain on the object - even during transit!

- Label items with important information such as country of origin and barcodes
- Are available with matte, gloss, and water-resistant tags in a variety of sizes
- Will not cut into your tender items or leave rust stains

EPDM BANDS

UV resistant EPDM Bands are designed to meet or exceed the unique application needs of the Agricultural Industry. They are trusted by professionals for unsurpassed quality and performance. These bands are available in a wide range of sizes and are manufactured with EPDM rubber - the premier weather-resistant synthetic elastomer.

- Available in Standard or Custom Sizes*
- Excellent resistance to ozone, UV, steam, water, and oxygen
- Made in the USA

**Subject to availability.*

EPDM ANCHOR BANDS For Aquaculture

EPDM Anchor Bands are a popular choice among those in the Aquaculture Industry as well. These bands bypass the need to utilize single-use zip ties which are harmful to the environment.

PALLET BANDS

Economical and easy to use, pallet bands contain and secure palletized items during movement within a warehouse. No longer waste time applying and reapplying stretch wrap or tape, when pallet bands can be applied and removed in seconds. Reusable pallet bands can be used to create significant savings with no equipment and minimal storage space required.

- Available in 72" to 112" circumferences
- Color coded by size
- Excellent for use on furniture or as mover bands
- Reduce packaging waste
- Ribbed for extra holding power

ITEM #	DESCRIPTION	INNER	CASE	MIN.

SUPERSIZE BANDS™

A super-sized job calls for a super-sized band. These 12" red, 14" green, and 17" x 1/4" blue bands are recommended for:

- Securing items during moving and storage operation
- Holding box carton flaps down
- Bundling carpets, mats, sleeping bags and/or packages
- Holding 44 gallon cans (12" & 14") & 55 gallon drum liners (17" only)

SEAFOOD BANDING MACHINES

The Seafood Banding Machine was created to decrease the pain associated with manual banding, but these machines also provide the additional benefits of increased efficiency and lowered overhead costs in oyster and lobster processing.

LOBSTER BANDING MACHINE

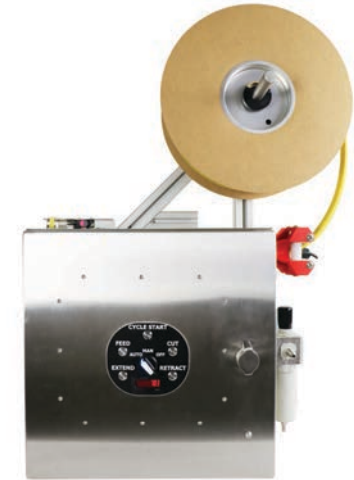

As fishermen know, the highest prices are offered for lobsters which are considered the highest quality. Any lobster with a hard shell, high survival rate, high meat yield, and good “ship-ability” will be purchased for top dollar at market. The Lobster Banding Machine not only decreases the pain and swelling to lobstermen's hands and forearms from manual banding, but it also decreases the stress on lobsters by significantly decreasing the time they are handled during processing. By decreasing the stress on the lobster, you're increasing its overall quality, taste, and texture.

OYSTER BANDING MACHINE

The Oyster Banding Machine is a great addition to any oyster processing facility, especially those that utilize High Pressure Processing. Banding the oyster beforehand ensures the best flavors and juices are sealed inside. When used in conjunction with Alliance's custom imprinted tubing, consumers will associate your brand with a delicious, high-quality, no-shuck oyster.

MACHINES IN USE**

Rubber Band SIZE CHART

PALE CREPE GOLD® RUBBER BANDS

The Gold Standard of Bands

The rubber band with the softest stretch to help prevent Carpal Tunnel Syndrome and resulting costly insurance claims. It has the highest percentage of rubber content and the greatest number of pieces per pound. Pale Crepe Gold® is highly recommended for repeated application.

STERLING® RUBBER BANDS

Best Value

The best value per rubber band. It has a high percentage of rubber content and an excellent count per pound. Sterling® is highly recommended for fast application and repeat use.

ADVANTAGE® RUBBER BANDS

Every Day Reliability

The rubber band for everyday use. It has a mid-range rubber content. Advantage® is recommended for industrial applications where a sturdy band with higher tensile strength is required.

1/16"

SIZES: 8, 10, 11, 12, 14, 16, 18, 19, 117-A

1/8"

SIZES: 27, 29, 30, 31, 32, 33, 117-B

1/4"

SIZES: 61, 62, 63, 64

3/8"

SIZES: 71, 72, 73, 74

1/2"

SIZES: 81, 82, 83, 84, 85

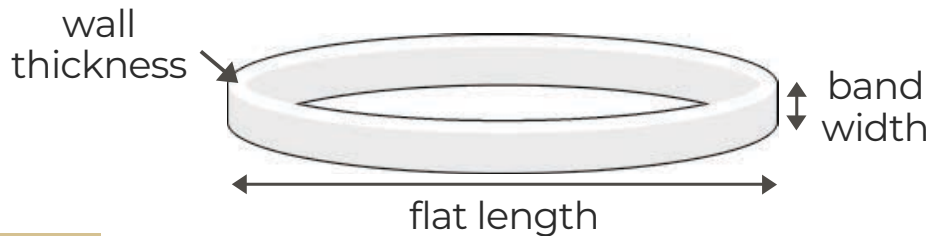

5/8"

SIZES: 105, 107

3/4"

SIZES: 92, 93, 94

How to Measure A RUBBER BAND

CUSTOM IMPRINTED BANDS

PRECISION vs. RANDOM

Custom Imprinted Bands provide an opportunity to promote your name, logo, website, country of origin, and/or promotion even after your item is gone. Alliance's imprinted bands are food-grade and environmentally friendly.

When you place an order for Custom Imprinted Bands, you'll be asked to choose between Precision or Random Imprint.

VISUAL DIFFERENCES

Precision Imprinted bands will display only the chosen content and limit the size of the imprint area on all sides. These bands are more labor-intensive and result in a much higher amount of scrap, therefore the overall cost and materials required to fulfill one order is higher when compared to Random Imprinted orders of the same size.

Random Imprinted bands will show at least one full imprint and a portion of the repeated content across the top and bottom. The imprint area is only limited to the flat length of the band. These bands can be produced in one continuous run which means they are less labor-intensive. Additionally, there is less scrap and less overall material required to fulfill an order which means significant savings for the customer.

Example Band = 3" x 0.5"

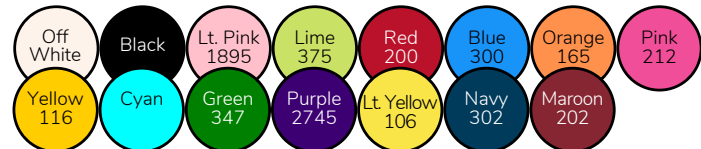

Imprint area = 2.375" x 0.25"

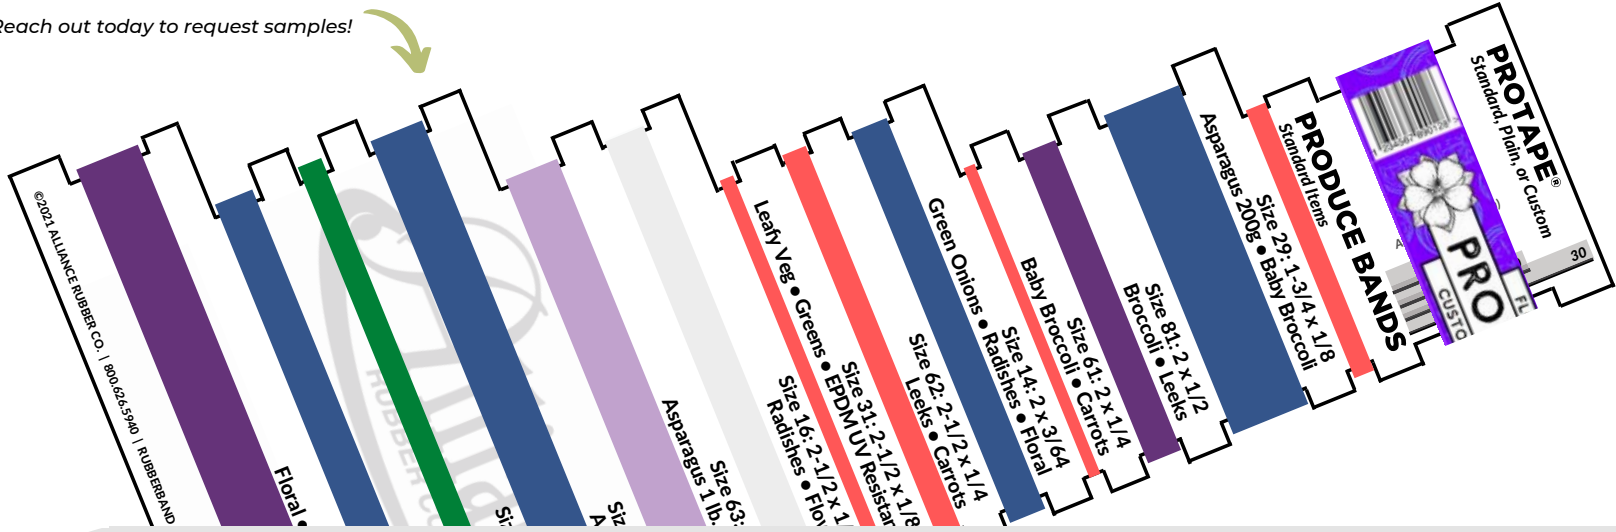

Imprint area = 2.375"

Alliance has the ability to match any PMS color, but we have the following colors available:

*Each custom imprint order may run, ship, and bill +/- 20% to allow for manufacturing variance.
